SUMMARY

Full Stack Developer with 1+ years of experience in Java, Spring Boot, Microservices, and Angular. Skilled in building REST APIs, responsive frontends, and database design (PostgreSQL, MongoDB, MySQL). Experienced in CI/CD pipelines, Docker, Kubernetes, and cloud deployment (AWS). Adept at secure authentication (JWT, OAuth2) and optimizing system performance by 30%. Strong problem-solving, collaboration, and scalable system design skills.

EDUCATION

- **Master of Computer Applications (MCA)**, National Institute of Technology, Warangal 2021–2024
- **Bachelor of Computer Applications (BCA)**, Gaya College, Gaya 2016–2019

WORK EXPERIENCE

- **Full Stack Developer**, Radixile Technology Solutions Sep 2024–Present
 - Developed scalable REST APIs with Spring Boot and PostgreSQL/MongoDB, handling 15,000+ daily requests and improving response time by 30%.
 - Built dynamic Angular dashboards with charts and tables, enhancing user workflow efficiency by 25%.
 - Implemented CI/CD pipelines using Docker, Kubernetes, and AWS, reducing deployment time by 40%.
 - Optimized data processing for 1M+ records, cutting computation time by 35%.
- **SDE Intern**, Intellect Design Arena Jan 2024–July 2024
 - Developed Spring Boot microservices to automate business workflows, improving processing efficiency by 20%.
 - Built Angular components for dynamic UIs with real-time updates, increasing user engagement by 15%.
 - Integrated third-party APIs with OAuth2 authentication, securing access for 500+ users.
 - Processed and analyzed large datasets (500K+ records), reducing errors by 25%.

PROJECTS

- **Smart Contract Management System**
Spring Boot, Angular, JWT, RBAC, PostgreSQL, Docker, AWS
 - Implemented role-based access control for employee records, payroll, attendance, and performance tracking.
 - Developed REST APIs consumed by Angular frontend; optimized search/filtering reduced query time by 40%.
 - Secured 100+ user sessions with JWT authentication and secure session management.
 - Deployed project using Docker and AWS, enabling scalable cloud access.
- **Employee Management System**
Spring Boot, Angular, MySQL, REST APIs, Docker, AWS
 - Applied role-based access control for managing employee data, payroll, attendance, and performance.
 - Built REST APIs and Angular frontend; advanced filtering reduced query time by 40%.
 - Integrated Docker and AWS for automated deployment and CI/CD.

SKILLS

- **Languages & Frameworks:** C++, Java, Spring Boot, Hibernate, Spring JPA, Spring Security, REST APIs, Microservices
- **Frontend:** Angular, TypeScript, HTML5, CSS3, Bootstrap
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Tools & DevOps:** Docker, Kubernetes, Git, Maven, CI/CD, AWS

CERTIFICATIONS & ACHIEVEMENTS

- 2023 – Java Spring Boot Microservices, Udemy
- 2021 – All India Rank 309, NIMCET MCA National-Level Entrance Exam
